

CLINICAL INFORMATICS

WHY & HOW

CONTENT MATTERS

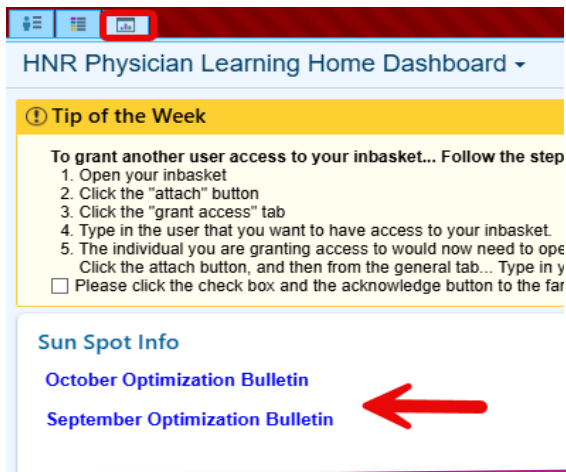

Topic: **WHAT'S NEW** in EPIC

Focus Area: **Monthly Epic Updates**

Communicating to you the meaning and purpose of what you do

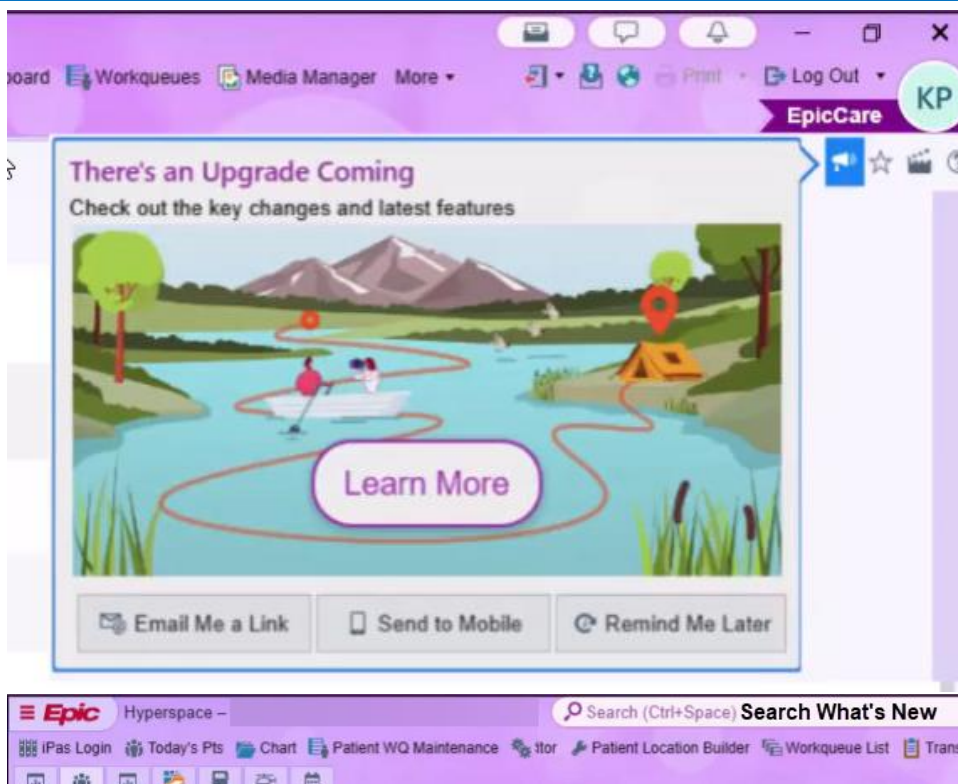

WHY it matters...

- The current process for keeping staff updated on changes in Epic is changing.
- Currently, monthly bulletins are posted on the Learning Home Dashboards, where your most used tip sheets live

HOW to do it...

- Starting on November 9, 2025, the format and location of these bulletins will change
- Two weeks prior to an update, you will see a megaphone icon in the top right-hand corner of your workspace with an alert that a change is coming.
- *Every Department/User type will have their own specific Learning Home Dashboard*
- You can dismiss the alert, e-mail yourself the alert, or reschedule the alert.
- If you choose to send a reminder to Haiku, or Canto-You must make sure that you are the last user to log into the device if it is a shared device, to receive a requested notification.
- Reminders will alert every 4 days
- A final reminder will appear the day of the upgrade
- The What's New information can be seen for about a month post implementation

You can search in your main search bar for the "What's new" function

Views will be automatically set to your role and work area, but you can view all updates or specific updates
