

# Long-Covid ECHO

How to treat your patients with long-term COVID syndrome using evidence-based practices

Supported by the Maricopa County Department of Public Health and the Centers for Disease Control and Prevention, Arizona State University (ASU) is launching a Long-Covid virtual seminar series for primary care providers in April 2023. Using the Project Extension for Community Healthcare Outcomes - **ECHO model** - these sessions consist of a collaborative **1-hour case-based learning and peer mentoring experience** for frontline clinicians. Sessions will take place each Thursday (12pm – 1pm) and will be led by a clinical expert. We invite primary care providers across Maricopa County to **join this free, interactive learning network** to collaboratively advance improvements in the treatment of patients suffering from Long COVID syndrome. To learn more please visit our website at: <https://chs.asu.edu/project-echo>.
